Subject: **Andamooka Matrix small pieces 16 Nov 2010**

Hi Folk

Very seldom do we get such small Andamooka Matrix pieces and when we do only 1% of them would ever be matching pairs. Just imagine buying a pair of beautiful matching blue green 6mm x 4mm Matrix opal for only \$20 the pair. That's one of the offers we have for you this time.

There is also a beautiful pair 7mm rounds for only \$37.60. I promise you you will never see them again. This is something I picked up ages ago and we have really only looked at them recently.

There is a packet of round stones for \$575.80 5-8mm rounds, you don't have to buy them all but if you would like say 2-10 we will weigh them out for you?

The 9mm x 7mm 1.8cts Blue Matrix opal for only \$27 is an absolute gift, the dome on it is 5mm high. If the people who actually cut these saw what we were selling them for they would turn in their graves, that's how old these stones are and they are as good as the day they were cut.

You can make some lovely jewellery from these.

See the pictures of the rounds that are set on some metal, these can be made into earrings. At the moment they are being used as gold cribbage pegs, what a great idea. If you have interesting things that you are doing with our opals we really would appreciate a picture.

Regards

Murray
