**Subject:** Chips & Rough OFFER 6 Oct 2011

I have a range of Chips from \$25/oz through to the real gems Mintubi \$400/oz. The Lightning Ridge at only \$25/oz are a bargain, I probably have about 50oz if anyone needs bulk.

I really like the Olympic .92oz \$276 as you break the top off that you are going to get a very brilliant stone for the money and it's huge it measures 4" x 1" at its longest and widest part and is .5" thick. The thing about Olympic opal is it always faces better than it looks from the side. In the early days the buyers had it over the miners, the miners didn't really know what they had. The buyers of course quickly cut opal from the new field being the Olympic and we are talking 40 years ago at least. This is such a stone if you take the top off it and the colour runs right through it, one end is brilliant with reds and the other has beautiful bright green with reds not quite as bright. It's one hell of a stone for only \$276.

If you want opals that are going to thrill you everyone of those Olympic opals we have put in this Offer will do it.

There is a Mintubi specimen 12cm x 6cm and 1.5cm thick has black opal along the top, there will be nothing in the middle of the stone, it is a beautiful specimen for only \$895.

There is a super gem for only \$719 from Olympic which will make one hell of a man's ring or a lady's ring for that matter.

The .295oz three stones Olympic Reds & Greens for only \$236 is a beauty, the best stone in there will pay for it the rest is your profit.

Enjoy the pictures, enjoy our opal.

First in best dressed.

Regards

Murray
