Subject: **Dark Base Mintubi only \$25, \$40 & \$100/oz OFFER 5 Aug 2010**

Hi folk

We have 26oz. One dealer has already taken 10oz so there is the potential for 16 clients to have an ounce each. We certainly won't be limiting you to an ounce but first in best dressed. This opal was mined over 20 years ago and has just hit the market this week. Opal like this is no longer mined in Mintubi and this is your chance to get a little bit. I am not saying it is gem but it is fantastic value.

I have another parcel of Dark Base Mintubi, we call it dark base but some of it is actually black. I have 14oz at only \$25/oz so that won't last long.

Whilst we are onto dark base take a look at the picture below, there are approximately 6oz of Blue Green Dark Base, every stone will cut a stone, it's not often you get the blues in the dark base but for only \$100/oz this is a bargain.

Heather has taken a couple of close up pictures of each grade so you can get a look at the size and colour in the stones. I can highly recommend these 3 packets of unusual opal to you.

Regards

Murray
