Subject: Doublets OFFER 15 Dec 2010

This week we are going to send you pictures of some beautiful gem doublets.

When we make doublets, we usually put Queensland Boulder ironstone on the back because:

1. it's very strong,
2. it takes a wonderful polish and looks good, and
3. we have quite a lot of it available from our opal mining friends in queensland.

Doublets are often referred to as a "poor man's black opal". They are gorgeous and if they were indeed flat topped black opals you'd be looking at about 10 times the price.

The 3.72ct special Shell Doublet really is something to behold. It is a shell and the cutter has ingeniously put into the back of it Boulder opal to support the quite thin, in places, shell. This is only a shell by definition because it is attached to the Boulder. The shell produces beautiful colour and can stand alone however if it weren't for the Boulder backing it could be damaged quite easily. You can go 1,000 miles in any direction and you won't find another special shell doublet like we have in here for only \$150, not only is it beautiful it is unique.

We have more doublets at much lesser prices but to begin with we send you these beautiful gems.

Regards

Murray

1. \$150 IMG_5822 SPECIAL Shell Doublet 3.72cts
2. \$150 each IMG_0422.JPG Boulder Gem Doublets
3. \$250 IMG_7975.JPG Doublet Gem
