Hi folk

For those of you would would like to make a triplet or two we have some beautiful triplet slides, all they need is a top, probably a quartz top. I think that these are suited to freeform. With beautiful gem colours, the opal has already been sliced, the back of it painted black and stuck down on glass. If you are going to make a triplet this is the easiest way to do it, we have done the hard work for you.

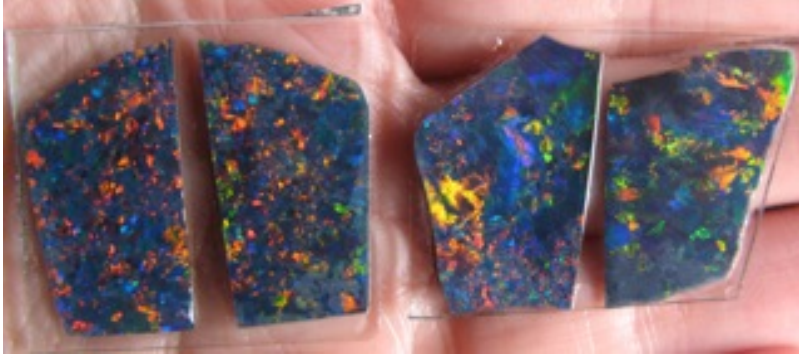

You don't have to buy them all. Just let us know how many you would like?

Good luck with your triplet making.
