Subject: **Rough Opal Affordable Packets 16 Mar 2010**

Today we are sending you pictures of more rough opal from very affordable packets. We are finding that in this economic climate people are being a little more selective in what they are buying so we have broken our parcels into very affordable packets.

We have some Black Mintubi here that is just beautiful, it's not big parcels only individual stones but if you are interested in a black this is the time to get one. You are really getting about a 30% discount because your dollar has dropped and we have left the old prices on the stones so it's a big win for you. Something that would have cost you \$1,000 eighteen months ago, with your dropping dollar should be costing you \$1,600 today so really that is a huge discount.

There is just one dark base 17 Mile stone here only \$342, it's more than 1" square and in some places 10mm thick. It has a brilliant bar of reds, greens and golds. This parcel has been a magnificent parcel and we have many people who have bought more. We have cut some beads from it and some for our family from this lovely material, that's how good it is, see last few photos, the beads were cut from thicker material of course.

There are a couple of very very small gems here. The gem from Andamooka at \$60 and the other one for \$154 are just absolutely brilliant. They are small but you'll like them I guarantee.

The .5oz small Andamooka stones are quite brilliant only \$400 the lot. You can use them as small stones, that's another parcel you would be very happy with.

Enjoy.

Regards

Murray
